

Press Release

Zambian delegation visits DERMALOG

Between the 11th and 15th of November 2019 Dermalog received a visit from a Zambian Delegation in relation to the INRIS (Integrated National Registration Information System) Project.

The delegation came to discuss the Phase 2 of the INRIS Project, whose Phase 1 was a Pilot implemented by Dermalog in 2014/15. Dermalog had the honor to host Dr. Liya Nawa Mutale, the Permanent Secretary Ministry of Home Affairs, Dr. Gregory Chola Nsofu, Director IT of the National Pension Scheme Authority and Mr. Dylan Kasonde, Director IT of the Electoral Commission of Zambia. During the visit the Delegation discussed, inspected and tested the different technology options for the enhancement and extension of the current Integrated National Registration Information System.

About DERMALOG:

DERMALOG Identification Systems GmbH with head offices in Hamburg is Germany's pioneer for biometry and the largest German manufacturer of biometric devices and identification systems. One of the shareholders in DERMALOG is the state-owned German National Printing house, the Bundesdruckerei.

DERMALOG employs a team of scientists who continuously develop biometric identification systems (so-called "AFIS" and "ABIS" systems), including cutting-edge fingerprint scanning devices. The product portfolio is complemented by biometric border control systems, biometric e-ID cards and e-passports as well as biometric voting systems. 'FingerLogin', 'FingerPayment' and 'FingerBanking' are also solutions developed by DERMALOG, as are systems for automatic face and iris recognition.

Other than Germany and Europe, the main markets of DERMALOG are in Asia, Africa, Latin America, and the Middle East. To date, the company has provided its technologies and solutions to more than 220 large-scale installations in 86 countries.

DERMALOG has provided many National ID card systems such as the first multipurpose biometric electronic ID card in the world, delivered for the state of Brunei in the year 2000. Cambodia, Ghana, Haiti, Sudan and the Maldives also had their full e-ID card systems implemented by DERMALOG.

DERMALOG also offers biometric solutions for banks and the manufacturers of automated teller machines (ATM). This includes the largest biometric banking project worldwide (USD 50 million), which was delivered by DERMALOG (the so-called "BVN Project"): 23 banks and the Central Bank of Nigeria were provided with DERMALOG's ABIS, which prevents double identities among bank customers by means of finger and face recognition and guarantees the best possible biometric identification of customers (KYC) for these banks. Furthermore, many ATMs across the globe have been equipped with DERMALOG's fingerprint technology.

Additionally, DERMALOG offers state-of-the-art biometric border control systems, making an important contribution to significantly speeding up and simplifying passenger handling, for example with facial or fingerprint recognition. Twelve states that include Singapore, Malaysia, Maldives, Cambodia, Thailand, Algeria and Brunei, are already relying on DERMALOG's solutions to monitor their national borders. The company's fingerprint scanners are also in use at German airports and at border crossings in Switzerland and the Netherlands. This makes DERMALOG Europe's leading provider of border control systems.
